Reference	Pano/BS-002-EN
Title	Complements for SNMP-V3 with TSM mode
Issue date	26 - Oct - 2018
Severity	Standard
Document version	1.2
Source(s)	https://www.openssl.org/news/secadv/20171207.txt

Complements for SNMP-V3 mode TSM

1 Description

This security update contains the following changes and fixes for SNMP-V3 in TSM mode (secured by the DTLS transport layer):

- It is now possible to send and receive traps in SNMPv3 in TSM mode.
- The agent no longer sends traps in SNMPv2 when configured to use the SNMPv3 protocol.
- Panorama uses OpenSSL for SNMPv3 communications in TSM mode. This library has been updated to the version 1.0.2n to address the following vulnerabilities: CVE-2017-3737 and CVE-2017-3738 (see <https://www.openssl.org/news/secadv/20171207.txt>).
- The agent did not control the certificates of managers connecting with SNMPv3 TSM mode.

Affected versions
<ul style="list-style-type: none">• Panorama Suite 2017 without an update of family 03 ≥ PS2-1700-03-1019• Panorama Suite 2019 is not concerned

2 Solution

Install updates [PS2-1700-03-1019](#) or higher.
